(a) Heat Stress Accrual (Cumulative Days with $T_{max} \geq 30^\circ C$)

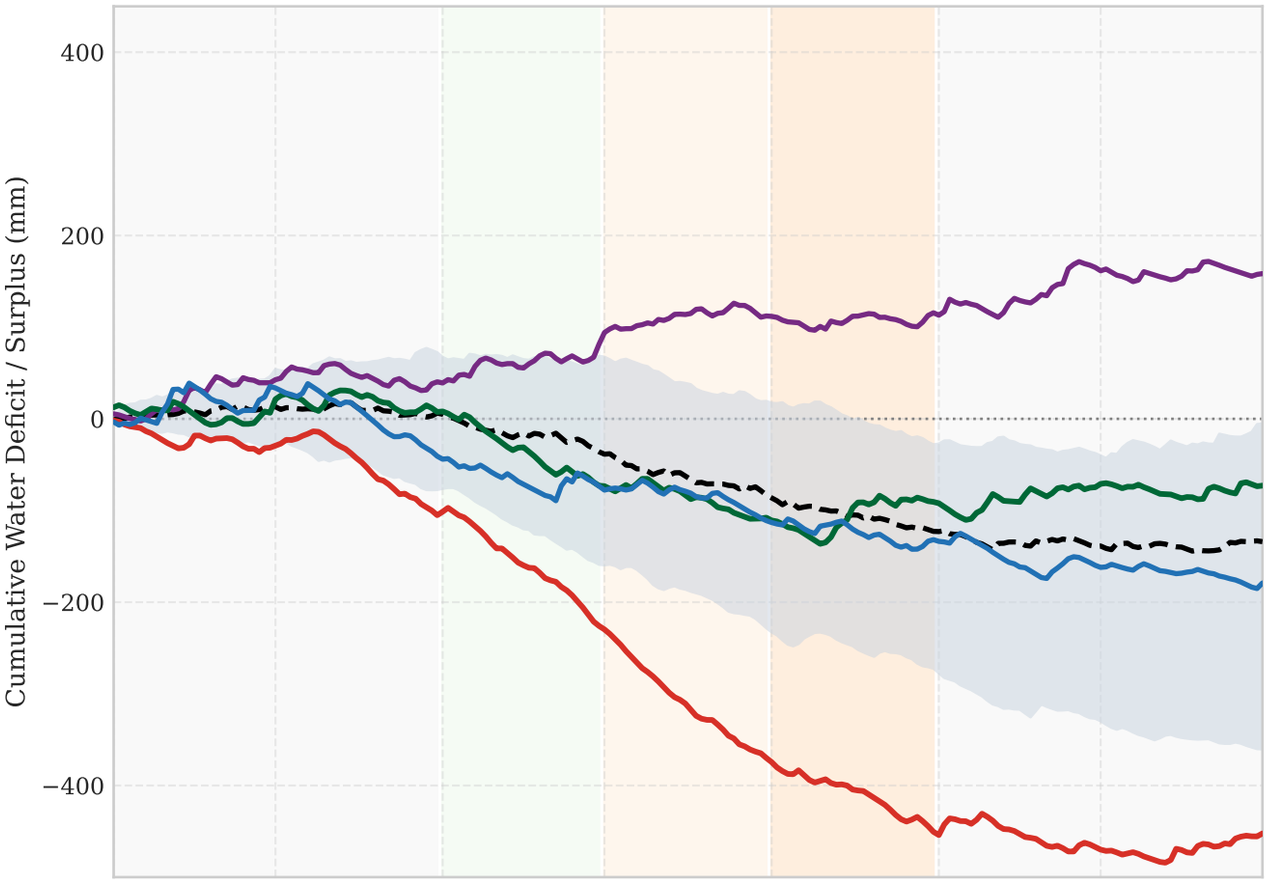

(b) Hydrological Supply (Cumulative Total Precipitation P)

(c) Atmospheric Thirst (Cumulative Penman-Monteith ET_0)

(d) Cumulative Net Climatic Water Balance ($P - ET_0$)

Climatological Range (10th–90th %ile)
Climatological Median
2012 Shock: Flash Drought (-11.7%)
1993 Shock: Midwest Flood (-10.5%)
2016 Bumper: Optimum Buffer (+10.8%)
1994 Bumper: Ideal Balance (+10.7%)
